- Public Library Card

- Ethernet Adaptor
- Extra charger/power cord for electronic devices
- Dropbox account
- Kleenex for locker

Notice for all students enrolled in an Algebra II course this fall (any level): The Mathematics Department would like to remind students that graphing calculators are required for all Algebra II courses. You may access the document outlining calculator requirements at [tinyurl.com/RiceMath](http://tinyurl.com/RiceMath). In addition, two sets of review problems have also been made available on the same website. These problems require the use of prerequisite skills that are needed to be successful in Algebra II.

For your convenience, in case a review of content is needed, links to videos have been included at the end of the first problem set. Answer keys have also been posted. Reviewing during the summer months, although not mandatory, would certainly be beneficial.

Please contact a faculty member of the math department if you have any questions.
